PD

The Preliminary amendment received 9/16/03 has been entered and claims 59, 63, 65-69, 74, 78, 79, 87, 88, 91-94, 188, 206, 225, 226 and 228 are currently pending in this application. Please update the continuing information in the specification regarding the allowed parent patent.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 59, 63, 65-69, 74, 78, 79, 87, 88, 91-94, 188, 206, 226, 228, drawn to a method for assessing the coagulation system, classified in class 435, subclass 13.
- II. Claim 225, drawn to a method of determining a coagulation status of a patient, classified in class 435, subclass 13.

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are distinct because the method for assessing the coagulation system of Group I by triggering a thrombin explosion has a different function and different method steps from a method of determining a coagulation status of a patient with metal cations and vesicles.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
